# INTERACTIONS

On the menu, the links will change their color when on hover. And the link that it's for the current page will be a different color to indicate that we are already on this page.

On the main page, in the grid of my projects, when hovering on an image, the image will lower its opacity and the project name and its category will be revealed. Users can click on each image to see the full page of the project.

On the project page, the first image (the bigger one after the splash image) will have a small movement when on hover.

Top and Bottom icon (button) of an arrow to go to the main content from the splash screen and return to the top.

Social media icons and slogan will change its color when on hover.

Buttons will change their color on hover and have a small animation on click.
